

PFAS Well Inspection & Water Quality Testing

As a unique advocate for private well owners and public water users, our team has researched and analyzed the health impacts, science and best practices of maintaining water quality.

We have identified treatment solutions and are working side-by-side with local authorities on PFAS contamination in ground water.

We inform people living in areas of concern about the health impacts of PFAS in drinking water, and empower them with solutions for removing it.

For additional information on PFAS, visit safewell.us/PFAS

PFAS Service

EPA 537 6 Analytes Test plus Field Test Blank

INSPECTION

Comprehensive water system inspection	💧
Water treatment system inspection	💧
Groundwater monitoring/measurements	💧

TESTING: PFAS (METHOD 537)

Perfluorobutanesulfonic acid	PFBS	💧
Perfluoroheptanoic acid	PFHpA	💧
Perfluorohexanesulfonic acid	PFHxS	💧
Perfluorononanoic acid	PFNA	💧
Perfluorooctanesulfonic acid	PFOS	💧
Perfluorooctanoic acid	PFOA	💧

SERVICE

Personalized report	💧
Expert water quality guidance	💧
6-Star customer service	💧

Our Promise: Not just safe water. Healthy water.
